Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- (Original) An isolated nucleic acid comprising a polynucleotide that encodes a polypeptide of either one of SEQ ID NOS: 2 or 6.
- (Original) A vector comprising at least one nucleic acid of claim 1.
- (Original) An expression cassette comprising at least one nucleic acid of claim 1 operably linked to a promoter, wherein the nucleic acid is in sense or antisense orientation.
- (Original) A non-human host cell into which is introduced at least one expression cassette of claim 3.
- (Original) The host cell of claim 4 that is a plant cell.
- 6. (Original) A transgenic plant comprising at least one expression cassette of claim 3.
- (Original) The transgenic plant of claim 6, wherein the plant is maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.

- 8. (Currently Amended) A seed from the transgenic plant of claim 6, wherein the seed comprises the expression cassette.
- (Original) The seed of claim 8, wherein the seed is from maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.
- 10. (Original) An isolated nucleic acid comprising a polynucleotide having at least 73% sequence identity to either one of SEQ ID NOS:1 or 5, or a complement thereof, wherein the % sequence identity is based on the entire coding sequence and is determined by BLAST 2.0 using default parameters, wherein said polynucleotide encodes a starch synthase.
- (Original) A vector comprising at least one nucleic acid of claim 10.
- 12. (Original) An expression cassette comprising at least one nucleic acid of claim 10 operably linked to a promoter, wherein the nucleic acid is in sense or antisense orientation.
- (Original) A host cell into which is introduced at least one expression cassette of claim 12.
- (Original) A transgenic plant comprising at least one expression cassette of claim 12.
- (Currently Amended) A seed from the transgenic plant of claim 14, wherein the seed comprises the expression cassette.

- 16. (Original) An isolated nucleic acid comprising a polynucleotide which hybridizes under high stringency conditions to a polynucleotide having the sequence set forth in either one of SEQ ID NOS:1 or 5.
- 17. (Original) A vector comprising at least one nucleic acid of claim 16.
- 18. (Original) An expression cassette comprising at least one nucleic acid of claim 16 operably linked to a promoter, wherein the nucleic acid is in sense or antisense orientation.
- (Original) A non-human host cell into which is introduced at least one expression cassette of claim 18.
- (Original) A transgenic plant comprising at least one expression cassette of claim 18.
- 21. (Currently Amended) A seed from the transgenic plant of claim 20, wherein the seed comprises the expression cassette.
- 22. (Original) An isolated nucleic acid comprising a polynucleotide comprising the sequence set forth in either one of SEQ ID NOS:1 or 5, or a complement thereof.
- 23. (Original) A vector comprising at least one nucleic acid of claim 22.
- 24. (Original) An expression cassette comprising at least one nucleic acid of claim 22 operably linked to a promoter, wherein the nucleic acid is in sense or antisense orientation.

- (Original) A host cell into which is introduced at least one expression cassette
 of claim 24.
- 26. (Original) A transgenic plant comprising at least one expression cassette of claim 24.
- 27. (Original) The transgenic plant of claim 26, wherein the plant is maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.
- 28. (Currently Amended) A seed from the transgenic plant of claim 26, wherein the seed comprises the expression cassette.
- 29. (Original) The seed of claim 28, wherein the seed is from maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.
- 30. (Original) An isolated nucleic acid comprising a polynucleotide encoding a starch synthase from Cucurma zeodaria or a complement thereof.
- 31. (Original) A vector comprising at least one nucleic acid of claim 30.
- 32. (Original) An expression cassette comprising at least one nucleic acid of claim 30 operably linked to a promoter, wherein the nucleic acid is in sense or antisense orientation.
- (Original) A non-human host cell into which is introduced at least one expression cassette of claim 32.

- 34. (Original) The host cell of claim 33 that is a plant cell.
- 35. (Original) A transgenic plant comprising at least one expression cassette of claim 32.
- 36. (Original) The transgenic plant of claim 35, wherein the plant is maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.
- 37. (Currently Amended) A seed from the transgenic plant of claim 36, wherein the seed comprises the expression cassette.
- 38. (Original) The seed of claim 37, wherein the seed is from maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.
- 39. (Original) A method for modulating the level of starch synthase protein in a plant, comprising:
 - stably transforming a plant cell with a starch synthase polynucleotide of Claim 1 operably linked to a promoter, wherein the polynucleotide is in sense or antisense orientation;
 - (b) growing the plant cell under plant growing conditions to produce a regenerated plant capable of expressing the polynucleotide for a time sufficient to modulate the level of starch synthase protein in the plant.
- 40. (Original) The method of claim 39, wherein the plant is maize, soybean, alfalfa, sunflower, Brassica, cotton, sorghum, wheat, barley, millet, rice, cassava, potato, Arabidopsis, tomato, pepper, apple, spinach, or lettuce.

- 41. (Original) The method of claim 39, wherein starch synthase protein is increased.
- 42. (Original) The method of claim 39, wherein starch synthase protein is decreased.
- 43. (Original) A method for modulating the morphology and/or amount of starch in a plant, comprising:
 - stably transforming a plant cell with a starch synthase polynucleotide of Claim 1 operably linked to a promoter, wherein the polynucleotide is in sense or antisense orientation;
 - (b) growing the plant cell under plant growing conditions to produce a regenerated plant capable of expressing the polynucleotide for a time sufficient to modulate the morphology and/or amount of starch in the plant.
- 44. (Original) The method of claim 43, wherein the starch exhibits altered degree of crystallinity.
- 45. (Original) The method of claim 43, wherein the starch exhibits altered temperature of gelatinization.
- 46. (Original) The method of claim 43, wherein the starch exhibits altered density.
- 47. (Original) The method of claim 43, wherein the starch exhibits altered digestibility.
- 48. (Original) The method of claim 43, wherein the starch exhibits altered level of covalently bound phosphate.

- 49. (Original) The method of claim 43, wherein the starch exhibits altered branching patterns.
- 50. (Original) The method of claim 43, wherein the starch exhibits altered degree of polymerization.
- 51. (Original) The method of claim 43, wherein the starch exhibits altered average chain length.
- 52. (Original) The method of claim 43, wherein the starch exhibits altered rate of retrogradation.
- 53. (Original) The method of claim 43, wherein the starch synthase polynucleotide comprises either one of SEQ ID NOS: 1 or 5 or functional derivatives thereof.
- 54. (Original) The method of claim 43, wherein the plant is Zea mays.
- 55. (Original) The method of claim 54, wherein the starch exhibits altered granule diameter in the range of 31 mm to 100 mm.
